What are the key risks that are specific to the issuer?		
<p>The Issuer is subject to the following key risks:</p> <ul style="list-style-type: none"> • <i>Risk that funds lent by the Issuer to Group Companies are not repaid:</i> The Issuer is a finance vehicle established by the Guarantor for the purpose of issuing debt securities, preferred securities (<i>participaciones preferentes</i>) and other financial instruments and on-lending the proceeds to the Guarantor and its consolidated subsidiaries (the "Group"). The Issuer is therefore dependent upon other members of the Group paying interest on and repaying their loans in a timely fashion. Should any Group member fail to pay interest on or repay any loan in a timely fashion this could have a material adverse effect on the ability of the Issuer to fulfil its obligations under the Notes which could have an adverse impact on the rights of noteholders and the return on their investment. • <i>Certain Creditors of the Issuer will rank in priority above Noteholders:</i> Under Irish law, the claims of a limited category of preferential creditors will take priority over the claims of unsecured creditors in the event of the appointment of a liquidator or a receiver to an Irish company such as the Issuer. These preferred claims include taxes, such as income tax and corporation tax payable before the date of appointment of the liquidator or receiver and arrear of value added tax, together with accrued interest thereon and claims of employees. • <i>Risks in connection with Examination:</i> Examination is a court procedure available under the Irish Companies Act 2014 to facilitate the survival of Irish companies in financial difficulties. The Issuer, the directors of the Issuer, a contingent, prospective or actual creditor of the Issuer, or shareholders of the Issuer holding, at the date of presentation of the petition, not less than one-tenth of the voting share capital of the Issuer, are each entitled to petition the court for the appointment of an examiner. The primary risks to the Noteholders if any examiner were to be appointed with respect to the Issuer are as follows: the potential for a scheme of arrangement being approved involving the writing down of the debt due by the Issuer to the noteholders; and in the event that a scheme of arrangement is not approved and the Issuer subsequently goes into liquidation, the examiner's remuneration and expenses (including certain borrowings incurred by the examiner on behalf of the Issuer and approved by the relevant court) will take priority over the amounts secured or unsecured owing to the noteholders.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- *The Group's growth, asset quality and profitability, among others, may be adversely affected by a slowdown in one or more of the economies in which the Group operates, as well as volatile macroeconomic and political conditions:* Volatile conditions in the global financial markets could also have a material adverse effect on the Group, including on the ability of the Group to access capital and liquidity on financial terms acceptable to the Group, if at all. If capital markets financing ceases to become available, or becomes excessively expensive, the Group may be forced to raise the rates paid on deposits to attract more customers and become unable to maintain certain liability maturities. Any such increase in capital markets funding availability or costs or in deposit rates could have a material adverse effect on its interest margins and liquidity. The Group's results are also affected by other market conditions on a global and local scale, such as an increase in protectionism or trade tensions, higher barriers to immigration and the effects of the coronavirus.

- *The global covid-19 pandemic has materially impacted the Group's business, and the continuance of this pandemic or any future outbreak of any other highly contagious diseases or other public health emergency, could materially and adversely impact the Group's business, financial condition, liquidity and results of operations:* Although the global economy has begun to recover from the covid-19 pandemic, certain adverse effects of the pandemic continue to impact the macroeconomic environment and may persist for some time. Should the ongoing effects of the covid-19 pandemic continue for an extended period of time, or worsen, the Group's business, financial position, liquidity, results of operations and prospects could be adversely affected.
- *The Group including the Guarantor is subject to extensive regulation and regulatory and governmental oversight which could adversely affect its business, operations and financial condition:* As a financial institution, the Group including the Guarantor is subject to extensive regulation (including regulation relating to capital requirements, funding and liquidity and the development of a fiscal and banking union in the EU), which materially affects its businesses. Any legislative or regulatory action and any resulting changes to the Group's business operations, as well as any deficiencies in its compliance with such legislation and regulation, could result in significant loss of revenue, limit its ability to pursue business opportunities and provide certain products and services, affect the value of assets that it holds, require the Group to increase its prices and therefore reduce demand for its products, impose additional compliance and other costs on the Group or otherwise adversely affect its businesses.
- *Increasingly stricter capital regulations and potential requirements could have an impact on the functioning of the Group and its businesses:* Increasingly onerous capital requirements constitute one of the Guarantor's main regulatory challenges. Increasing capital requirements may adversely affect the Guarantor's profitability and create regulatory risk associated with the possibility of failure to maintain required capital levels.
- *The credit quality of the loan portfolio of the Group may deteriorate and the Group's loan loss reserves could be insufficient to cover its loan losses, which could have a material adverse effect on the Group:* Non-performing or low credit quality loans have in the past negatively impacted the Group's results of operations and could do so in the future. In particular, the amount of the reported credit impaired loans of the Group may increase in the future as a result of growth in the Group's total loan portfolio, including as a result of loan portfolios that the Group may acquire in the future (the credit quality of which may turn out to be worse than it had anticipated), or factors outside of its control, such as adverse changes in the credit quality of the Group's borrowers and counterparties or a general deterioration in economic conditions in the regions where the Group operates or in global economic and political conditions, including as a result of the war in Ukraine or a prolonged covid-19 pandemic with the emergence of variants resistant to existing vaccines could have a material adverse effect on the Group's activities and operations and affect the ability of the Guarantor to fulfil its obligations under the Guarantee.

What are the key risks that are specific to the securities?

The Notes are subject to the following key risks:

- *The Notes bear the credit risk of the Issuer and the Guarantor:* Holders of Notes bear the credit risk of the Issuer and the Guarantor. That is the risk that the Issuer or the Guarantor is not able to meet its obligations under such Notes, irrespective of how any principal, interest or other payments under such Notes are to be calculated. In such circumstances holders may lose some or all of their investment.
- *Hedging activities may affect the market price, liquidity or value of the Notes:* The Issuer, the Guarantor and/or any of their affiliates may enter into one or more hedging transactions with respect to the Rate of Interest or related derivatives and such hedging activities or proprietary or other trading activities by the Issuer, the Guarantor or their affiliates may, but are not intended to, affect the market price, liquidity or value of the Notes and which could be deemed to be adverse to the interests of the holders.
- *The occurrence of certain events may adversely affect the value or liquidity of the Notes:* In the event of the occurrence of certain events affecting the Reference Item, the calculation agent may make adjustments in accordance with the terms of the Notes. Any such action may reduce the overall return on the investment of the holder or adversely affect the value and liquidity of the Notes.
- *An investment in the Notes is not comparable to an investment in a conventional debt security:* Amounts of interest and principal under the Notes may depend on the price of the Reference Item. An investment in the Notes may bear similar market risks to a direct investment in the Reference Item but also entails significant risks not associated with a conventional investment. For example, payment of principal or interest may occur at a different time than expected had holders of the Notes invested directly in the Reference Item.
- *The value of the Notes is linked to the performance of the underlying Reference Item which may affect the overall return on investment:* The Reference Item may trade and invest in a broad range of investments such as debt and equity securities, commodities or commodity indices and foreign exchange and may enter into derivative transactions, including, without limitation, futures and

options. The Reference Item may often be illiquid and may only be traded on a monthly, quarterly or even less frequent basis. The trading strategies of the Reference Item are often opaque. The Reference Item, as well as the markets and instruments in which it invests, are often not subject to review by governmental authorities, self-regulatory organisations or other supervisory authorities. Consequently, Holders may be exposed to the volatility in the performance of the Reference Item which may affect the overall return on their investment.
